GOVERNMENT OF MAHARASHTRA BUREAU OF ECONOMICS AND STATISTICS

STATISTICAL ABSTRACT

OF

Maharashtra State

FOR THE YEAR

1967-68

NAGPUR GOVERNMENT PRESS 1971

PREFACE

This is the fifth issue of the Statistical Abstract of Maharashtra State. The scope of the Abstract is generally the same as that of the earlier issues of the Statistical Abstract, except that certain tables on area and population in each taluka, ASI—sample part results, imports and exports handled at minor ports, vital statistics, registration of marriages and of documents have been added in the present issue. Tables on constitution of municipal councils and municipal corporation, distribution of pupils by age and on compulsory education have been omitted in this issue. Attempt has been made, to the extent possible, to present the districtwise statistics up to the year 1967-68. In certain cases, however, the relevant statistical information for the year 1967-68 is not yet available from the original sources. In such cases, the latest available information is presented.

For compiling the information for the Statistical Abstract various Departments and Offices of State Government, Government of India and local organisations have extended necessary assistance by supplying requisite material to us and we are thankful to all these organisations.

It is hoped that this publication giving districtwise statistics on most of the socio-economic characteristics of the State will serve as a detailed reference book for those who are interested in socio-economic and regional studies of the State.

S. M. VIDWANS,

15th June 1970.

Director,
Bureau of Economics and Statistics, Bombay.

STATISTICAL ABSTRACT OF MAHARASHTRA STATE 1967-68

The figures of Greater Bombay District are inclusive of the three talukas, viz., Andheri, Borivali and Kurla.

Source.—Consus of India 1968, Volume X, Part II-A.

[†]The existing Kalyan Taluka was divided to form two talukas, viz., Kalyan and Ulhasnagar in Thana district with effect from 25th January 1969.

[†]Two new Mahals namely, Kavthe Mahankal and Atpadi were subsequently formed in Sangli district. These are new talukas.

# APPENDIX

# EXPLANATORY NOTE ON SOURCES AND LIMITATIONS OF STATISTICS PRESENTED IN THE STATISTICAL ABSTRACT

# 1. Purpose and Scope:

- 1.1. This is the fifth issue of the Statistical Abstract of Maharashtra State which is being published since its formation in 1960. As stated in the first issue, the purpose of publishing this Abstract is to present background statistical material on as many socio-economic characteristics of the State as is possible so that the Abstract may prove useful not only as a reference book but also for research, planning or further socio-economic studies about the State. The information is, to the extent feasible, presented districtwise for inter-district comparison. Some social and economic statistics are presented over a series of years to bring out changes
- 1.2. The present issue relates to the year 1967-68 and the detailed data are published for the year 1967-68 wherever possible Also, yearly series up to the year 1967-68 are presented. Wherever data for 1967-68 were not available, the data for the lates available year are given. The statistical data presented in these Abstracts are initially compiled by various departments of the State Government, Government of India, Local Bodies, etc. These departments usually prepare and release provisional figures for recent years. These provisional figures are in the process of finalisation and ultimately when they are finalised, they are slightly different from the provisional figures released earlier. For this reason, the data published in the Bureau's other publications viz., 'Handbook of Basic Statistics of Maharashtra State', 'Maharashtra—An Economic Review' or the earlier issue of the Statistical Abstract may be found to be slightly different from those published in this Abstract.

# Maharashtra State at a glance:

2.1. This table is divided in two parts. In the first part, some general particulars about the State are given. No. of talukas shown includes three talukas in Greater Bombay and two talukas in Sangli district. In 1967-68, there were thus 234 talukas in Maharashtra. In the second part, the important indicators under various heads such as population, agriculture, etc., are presented Maharashtra. In the second part, the important industrials under various licaus states as population, agriculture, the period to which the figures concerning Maharashtra and India, respectively relate is mentioned. In some cases, this period is not identical. In such cases, the data for latest available year for India is shown and comparison of Maharashtra with India is made with reference to this year or period. For instance, against item No. 1.1 (a), the rural population of Maharashtra is shown to be 7.9 per cent of the total rural population of the country. In addition, important comparable indicators are also shown both in respect of Maharashtra as well as in India. For instance, against item No. 1.1 (b), the percentage of rural population to the total population in the State is shown as 71.8 along with the corresponding percentage of 82.0 for all India.

The information regarding factories and employment shown against item 5.1 is inclusive of defence factories. Road length per 100 sq. km. of area shown against item 9.2 is quoted from 'Basic Road Statistics of India, 1967' published by the Ministry of Transport and Shipping. The estimates of State Income and National Income given against item 10 are according to revised series. For India, estimate of National Income and not Net National Domestic Product is shown. During 1967-68 Net National Domestic Product was estimated at Rs. 27,922 crores.

# 3. Summary Tables:

3.1. Summary tables on the following topics have been presented here: (1) Agriculture—(i) Land utilization, (ii) Area irrigated by sources, (iii) Area irrigated by crops, (iv) Area and outturn of principal food and non-food crops. (2) Livestock, (3) Community Development Programme, (4) Co-operation, (5) Industries (factory statistics), (6) Electricity, (7) Joint-Stock Companies, (8) Education, (9) Mineral production in Maharashtra, (10) Motor vehicles in operation, (11) Net State Domestic product at current prices, (12) Net State Domestic Product at 1960-61 prices, (13) Consumer Price Index numbers for working classes (old series) and New series. In these tables, data over a series of years are presented. In first three tables of Agriculture data are shown for the years up to 1966-67. In the table area and outturn the data as presented for the years 1951-52 to 1967-68, under livestock, the data pertaining to the four livestock censuses, i.e., 1951, 1956, 1961, and 1966 are shown. The Community Development Programme commenced in 1952-53. This table gives the position of the State as regards its coverage under the Programme at the end of each year since 1952-53. As regards Co-operation, the data for the years since 1958-59 are presented. The figures for earlier years according to new form are not available for some of items and hence are not shown here. Under Industries, informaend of each year since 1952-53. As regards Co-operation, the data for the years since 1958-59 are presented. The figures for earlier years according to new form are not available for some of items and hence are not shown here. Under Industries, information regarding number of working factories and their average daily employment is shown for the years 1950, 1955 and all the years since then. As regards Electricity, the data relate to calendar years up to 1956. Since 1957-58 the data relate to financial years. Under Joint Stock Companies at work, data for six years only as released by the Government of India could be furnished. Under Education, the data is presented for all the years since 1950-51. The table on mineral production which is newly added gives the figures for the years 1959 to 1967. This is also new table. Two new tables on Net State domestic products at current prices and at 1960-61 prices present revised figures. Consumer Price Index numbers for working classes—old series for six centres and new series for seven centres are also published in summary form.

# Area and Population (I):

4.1. Final figures of 1961 Population Census are presented in all the tables in this section. The table No. 1.1 gives districtwise figures of area, number of talukas, number of towns and villages and rural and urban population. Number of talukas shown in table 1.1 does not include three taluxas in Greater Bombay, two new talusas in Sangli district and one in Thana district. The number of taluxas as in 1961 are shown. A 'village' is a statutorily recognised village having a defined boundary and separate land records. Hamlets, wadies or padas have not been treated as separate villages. Forest villages make an exception. They are population centres situated within reserved forest areas. Their population mainly consists of forest labourers and their families. Such forest villages are also treated as villages. Number of inhabited villages shown in column (6) of table 1.1 denotes number of inhabited revenue villages and inhabited forest villages. Out of 35,851 inhabited villages in the State, 35,831 are inhabited revenue villages which include 422 revenue villages fully merged in urban areas. For the purpose of 1961 census, a town or an urban area was defined as a place which has (i) a municipality, a cantonment or civil lines or (ii) a population of 5,000 or over and at least three-fourth or more of male workers engaged in non-agricultural pursuits. The table No. 1.2 gives district wise figures of 1951 and 1961 population and percentage increase in 1961 population over 1951. The table No. 1.3 gives the classification of inhabited villages in each district according to different population ranges or classes. The table No. 1.4 gives similar break-up of towns or urban areas according to population ranges. The table No. 1.5 gives a complete list of town-groups and towns in each district and their sexwise population. The table No. 1.6 gives taluxawise population and area figures. The table No. 1.7 gives literacy percentages of the population in each district as in 1951 and in 1961. The 1951 figures had to be estimated in

#### 5. Climate (II);

- 5.1. The table No. 2.1 gives 'mean', 'mean maximum' and 'mean minimum' annual temperature for 1968 in respect of 38 centres in the State. The figures are based on the monthly data supplied by the Government of India's Regional Meteorological Centres at Colaba (Greater Bombay) and at Nagpur. The mean maximum and mean minimum are the average of maximum and minimum temperatures observed daily during the year. The mean temperature is the average of the mean maximum and mean minimum temperature thus arrived at.
- 5.2. The table No. 2.2 gives monthly normal rainfall and number of rainy days in each month and in each district. The district figures are the simple averages of the normal rainfall at different raingauge stations in each district and the number of rainy days respectively. The table No. 2.3 gives monthwise figures of actual rainfall and number of rainy days for 1968 in respect of each raingauge station in the district. Annual figures for 1967 and 1968 and figures of average or normal rainfall are also given for each centre. These centres are generally the taluka or district headquarters in the districts. The figures of average or normal rainfall are worked out on the basis of actual rainfall for the periods ranging from a minimum of five years to a maximum of eighty years. As regards rainy days, a day was treated as rainy day if during the twenty-four hours, the raingauge recorded a minimum of 2.5 mm. of rainfall.

#### 6. Agriculture (III):

- 6.1. The important statistics in the section are sub-divided into (i) land utilisation, (ii) irrigation and (iii) area and outturn of individual crops.
- 6.2. The table No. 3.1 gives districtwise figures of land utilisation for the year 1966-67 under the standard heads of utilisation. Against each district, the break-up of the total geographical area according to different type of land used is shown. The changes in the geographical area over years are mainly due to the progress of cadastral surveys. The area differences between the figures of total area according to the Village peners is calculated from the village returns prepared by the village of microsers. There are differences between the figures of total area according to the Surveyor General and according to the village papers because the latter is calculated to the control of the village papers because the latter is calculated to the control of the village papers because the latter is calculated to the control of the village papers because the latter is calculated to the control of the village papers because the latter is calculated to the control of the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers because the latter is calculated to the village papers and the village papers and village control of village control of village control and village village control village village control village village control village village village village village village village village village village village village village village village village village village village village village village village village village village village village village villag

# 7. Community Development Programme (IV):

7.1. The entire rural area of the State is now covered by the Community Development Programme. The State is delimited into Community Development Blocks of specified sizes. This section contains only one table, viz., table No. 4.1 which gives districtwise figures of achievements under selected items under C. D. Programme during 1967-68. The table shows achievements through other development activities, also, besides those under the Community Development Programme.

# 8. Animal Husbandry (V):

8.1. The table No. 5.1 gives the number of various types of livestock and poultry as enumerated in the State at the time of 1961 and 1966 Livestock Censuses. These are quinquennial censuses conducted throughout the country on the uniform basis of concepts and methods of enumeration. At these censuses, all the livestock is enumerated by house-to-house enquiry. Particular care is taken to enumerate livestock in slaughter-houses, stray animals and animals in transit. The table No. 5.2 gives statistics

^{*}The Survey of India calculates the area by planimetering from maps which represent the ground in horizontal plane with the help of areas of quadrilaterals of 15 minutes latitude and longitude already worked out by them.

A-307—52-B.

regarding number of animals and poultry treated and number of animals castrated in 1967-68 by veterinary staff of the Government, Zilla Parishads and Municipalities. The table No. 5.3 gives the number of different types of veterinary institutions of the Government, Zilla Parishads and Municipalities functioning in districts as on 31st March 1968. The table No. 5.4 gives information regarding number of different types of institutions owned by Government such as breeding farms, A. I. Centres etc. functioning as on 31st March 1968.

9.1. Two tables are included in this section. The table No. 6.1 gives details of area under different types of forests for 1967-68. Information regarding forests under the control of the State's Forest Department and those under the control of the State's Revenue Department is shown separately. The areas under forests are classified according to legal status into reserved forests, protected forests and unclassed forests. The legal status refers to the classification of forests under the Indian Forest Act, XVI of 1927. Reserved forests are those that are intended mainly for timber production and in which rights of grazing and cultivation are seldom allowed. In protected forests, the restrictions are not so rigid; right of grazing or cultivation is allowed but certain limitations and restrictions are imposed. The unclassed forest refers to the inaccessible forest or unoccupied waste. The forests which are taken by Government from local bodies or private individuals for management on lease basis are called 'leased forests'. There is no classification of ex-proprietary forests as such but in Nagpur division, some private lands containing valuable forests are taken over by Government under section 29 of the Indian Forests Act, and which are not yet classified as per tripartite classification are termed as ex-proprietary. The forest area shown in table No. 6.1 may not tally with the area under forest shown in table on land utilisation in agriculture section. The two sets of figures differ due to the following reasons: (1) In the Indian Forests Statistics Returns, the whole area including non-wooded area under the control of Forest Department is taken as area under forests while in a Agricultural Statistics, it is classified according to its actual utilisaof Forest Department is taken as area under forests while in a Agricultural Statistics, it is classified according to its actual utilisation (ii) The Forest Department returns are meant to serve a definite administrative purpose and indicate the ownership of the forest areas; the actual utilisation of these areas is not so important from their point of veiw as it is in the land utilisation statistics for Agricultural Department. (iii) The Forest Department returns relate to financial years, and Agricultural Statistics relate to the agricultural years. The table No. 6.2 gives production of major and minor forest produce for 1967-68. The figures are shown circlewise and refer to the areas under the control of Forest Department only.

#### Fisheries (VII):

10.1. The table No. 7.1 gives information regarding quantity of fish brought for curing at curing yard, quantity of salt issued and the quantity of fish removed in 1967-68. It refers to the curing done by salting process in Government curing yard-alone. The table No. 7.2 gives information regarding fishing boats, estimates of total fish production, activities of the co-opera-tive sector in fisheries and some salient features of the activities of the State's Fishery Department in 1967-68 while the table No. 7.3 gives further break-up of the marine fish production according to districts.

#### Co-operation (VIII):

11.1. Statistical information is shown separately in respect of the following groups of co-operative institutions: (i) Agricultural and non-agricultural credit, apex and central institutions (Table No. 8.1), (ii) Agricultural Credit Societies including primary land mortgage banks and grain banks (Table No. 8.2), (iii) Non-Agricultural Credit Societies (Table No. 8.3), (iv) Marketing Societies (Table No. 8.4), (v) Societies in productive enterprises (Table No. 8.5) and (vi) Other societies (Table No. 8.6). Table No. 8.1 covers Maharashtra State Co-operative Bank, Bombay State Co-operative Land Mortgage Bank, Maharashtra Housing Finance Society, District Central Co-operative Banks and District Industrial Co-operative Bank, Sholapur. Owned capital shows paid-up capital. Other borrowing denotes the total borrowings (other than deposits) outstanding at the end of the period. Working capital includes paid-up capital, deposits and borrowings. Loans outstanding includes outstandings in respect of loans, cash credits and overdrafts and the amount of the outstanding bills purchased or discounted. Overdues refer to the amount of loans or instalments which was due for collection but which was not actually collected and for the repayment of which no extension has been granted by a competent authority. Table 8.2 relates to the activities of the agricultural credit societies (large size and small size), primary land development bank and grain banks (active and contant) value of goods purchased, sold and stock at the end of the year refer to the consumer goods handled by the primary agricultural credit societies. Table 8.3 relates to the operation of urban banks and urban credit societies, employees credit societies and others. Table 8.4 relates to the activities of the marketing societies. Agricultural marketing societies are co-operative institutions the main object of which is the purchase and sale of agricultural produce grown by its members or members or premarketing or primary credit societies but not having any other pr primary society dealing directly with the agriculturists or primary credit societies but not having any other primary co-operative marketing organisation affiliated to it. It may be central or regional society in the nature of a federation of primary marketing societies in their area of operation. At the state level, there is marketing societies at the highest level in. the nature of a federation of a district or regional marketing societies. Table No. 8.4 also covers sugarcane supply societies which are specially organised for the sale of sugarcane of members. Table No. 8.5 covers cotton ginning and pressing societies, sugar factories, other agricultural processing societies such as paddy husking, rice mills, oil crushing, fruit and vegetable, etc., farming societies, irrigation societies dairy societies and unions, weavers societies, other industrial societies, spinning mills, co-operative industrial estates, fisheries societies, forest labourers' societies and societies engaged in matintenance and development of poultry farms and purchase and sale of poultries or poultires' products as well as ghee societies and other societies dealing with other livestock products. Table 8.6 covers consumer societies (wholesale and primary), primary housing societies, other agricultural non-credit societies, other non-agricultural non-credit societies, labour contract supervising unions, State unions and district co-operative board, insurance societies and federations societies and federations.

# 12. Rural Credit (IX):

The transactions of moneylending in the State are regulated and controlled under the provisions of the Bombay Moneylenders Act, 1946. According to the Act, no moneylender shall carry on the business of moneylending except in the area for which he has been granted a licence and except in accordance with the terms and conditions of such licence. The table No. 9.1 which he has been granted a licence and except in accordance with the terms and conditions of such licence. The table No. 9.1 gives districtwise figures of (i) number of applications received for grant of licences under the Bombay Money Lenders Act, 1946, (ii) number of licences granted, (iii) number of old licences renewed and (iv) number of moneylenders holding valid licences at the end of each year. The table No. 9.2 gives details of loans given to traders and non-traders. These loans are sub-divided into those not granted under section 22 of the Act, and those exempted under section 22.

# 13. Banks (X):

13.1. The table No. 10.1 gives a complete list of towns and villages in each district having bank offices in 1967. Number of bank offices include offices of scheduled, non-scheduled and co-operative banks. The reference period of each type is 31-3-1968, 31-12-67 and 30-6-67, respectively. The table No. 10.2 gives the distribution of number of places having banking offices and total number of banks therein in 1967 according to different population ranges. The table No. 10.3 gives districtwise number of scheduled bank offices, non-scheduled bank offices and co-operative bank offices in 1967. The source of this information relating to banks is 'Statistical tables relating to Banks in India' published by the Reserve Bank of India. The information is extracted from Appendix I of this publication. In the case of scheduled banks, the information shown for any particular year refers to 31st March of next year. For other Banks, it is as per the accounting period of the balance sheet available. Table No. 10.4 gives No. of joint stock companies as at the end of 31st March 1968.

#### 14. Loral Bodies (XI):

14.1. Financial position regarding Village Panchayats, Municipal Councils, Municipal Corporations, Zilla Parishads and Bombay Port Trust is shown in this section. Table No. 11.1 gives districtwise information of (i) number of Village Panchayats, (ii) their total coverage in terms of villages and population, (iii) their income and (iv) expenditure. The information is given for the years 1963-64 and 1964-65. In addition, for the State one more year 1962-63 is added. Number of Village Panchayats include number of independent village panchayats as well as group village panchayats. The number of villages covered and the population covered by the Village Panchayats are as per 1961 Census. Income and expenditure of Village Panchayats are exclusive of opening and closing balance, respectively. Under income, information is separately shown under grants, taxes and other income. Grants include Government grants as well as grants from Zilla Parishads and Panchayat Samities for development activities. Government grants are mainly land-revenue grant, equalization grant and local cess grant. The other taxes include other taxes and fees imposed by the Village Panchayats. Similarly, the other income of Village Panchayats is contributions, donations, gifts and fines for contraventions of rules. Table No. 11.2 gives the receipt position of each Municipal Council for the year 1964-65. The income has been shown according to (i) Municipal rates and taxes and other sources. Government grants under (ii) other sources are mainly grants on account of dearness allowance, grants for roads, for water-supply, for educational purposes, for medical purposes and on account of percentage in land revenue etc. The income from extraordinary receipts and debts includes loans, advances, deposits, sale-proceeds, etc. Table No. 11.3 gives similar income position in respect of four Municipal Corporations. Table Nos. 11.4 and 11.5 give details of expenditure by Municipal Council and by Municipal Corporations. Table Nos. 11.4 and 11.5 give details of exp rent expenditure is shown under six broad heads of the expenditure and includes both capital and revenue expenditure. The accounts rent expenditure is shown under six broad heads of the expenditure and includes both capital and revenue expenditure. I ne accounts of the Bombay Municipal Corportion are maintained separately for (i) city area, (ii) suburban area, (iii) extended suburban area, (iv) education fund, (v) improvement schemes and (vi) slum clearance schemes for city and suburbans. The totals for the entire Bombay Municipal Corporation are arrived at by summing up the above accounts excluding the inter-account transfers. They, however, do not cover the income and expenditure of Bombay Electric Supply and transport undertaking. In the case of Nagpur Municipal Corporation, income and expenditure of Nagpur Improvement Trust is not included. It may be mentioned here that all the Municipalities do not follow a uniform procedure for presentation of statistics regarding income and expenditure, with the result that it was very difficult to build up these statistics on comparable basis. The figures shown in these statements may, therefore, be regarded as only broad distribution into the items shown. Table No. 11.6 gives the particulars of income and expenditure in respect of 25 Zilla Parisheds in the State. The figures for 1966-67 are actuals while those for 1967-68 are revised estimates. result that it was very difficult to build up these statistics on comparable basis. The algures shown in these statements may, therefore, be regarded as only broad distribution into the items shown. Table No. 11.6 gives the particulars of income and expenditure in respect of 25 Zilla Parishads in the State. The figures for 1966-67 are actuals while those for 1967-68 are revised estimates. The receipts and expenditure of the Zilla Parishads are exclusive of opening balance and closing balance respectively. The receipts are shown under four sub-heads, viz., (i) self-raised resources, (ii) Government grants, (iii) grants for agency schemes and debt section. Self-raised resources are mainly land revenue, cess, local cess, local revenues, other taxes and fees imposed by the Zilla Parishads. While Government grants are mainly land revenue grant, purposive grant, establishment grant, plan grant, block grant, the companying the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state o etc. The expenditure is likewise shown under five broad heads, viz., (i) general administration, (ii) debt section and (v) others. The expenditure under community development is exclusive of expenditure under the head miscellaneous departments. It is also restricted to revenue expenditure and does not include capital expenditure and loans and advances. However, it includes revenue expenditure under local development works, agency scheme, training scheme and other general schemes. Table Nos. 11.7 and 11.8 give statistics regarding income and expenditure of Bombay Port Trust for 1967-68

# Industries and Mining (XII):

15.1. In this section, statistics regarding employment in industries, industrial and mineral production and statistics on such 15.1. In this section, statistics regarding employment in industries, industrial and mineral production and statistics on such related items as absenteeism, industrial disputes are presented. The factory statistics shown in table Nos. 12.1 and 12.2 cover following types of factories registered under Factories Act, 1948:—(i) Those employing ten or more workers working with the aid of power, section 2 m (i), (ii) those employing twenty or more workers and working without the aid of power, section 2 m (ii) and (iii) those registered under section 85 of the Act, under which the State Government makes applicable the provisions of the Act even though the above conditions are not fulfilled. However, defence factories are excluded. These tables show the number of working factories and not all the registered factories. The table No. 12.1 gives the distribution of working factories according to the size of the factory in terms of average daily employment of workers. The table No. 12.2 gives number of working factories and average daily employment therein according to major groups of industries. It must be mentioned here that the number of workers shown in these two tables are the average daily number of workers in the year and not the total number on the roll of the factories. The table No. 12.3 gives the figures of production of selected industries in the State during 1967. The table No. 12.4 workers shown in these two tables are the average daily number of workers in the year and not the total number on the roll of the factories. The table No. 12.3 gives the figures of production of selected industries in the State during 1967. The table No. 12.4 gives districtwise figures of mineral production and its value. The table No. 12.5 gives figures of absenteeism in cotton textile industries at a few selected centres in the State. The statistics relate to only voluntary absenteeism defined as absence due to reasons which are personal to the individuals concerned. As such, absence of a worker on account of strike, lock out or lay-of is not considered. They cover 'workers' as defined by the Factories Act, 1948, but exclude persons holding positions of supervision or management or employed in confidential position. Moreover, only regular workers (excluding casual and substitute workers) are considered. The absenteeism rate is the ratio of number of manshifts lost due to absences to the number of manshifts scheduled to work. The table No. 12.6 gives statistics regarding industrial disputes in the State for the years since 1958 to 1967 and for cach month of 1967. For the purposes of statistics, an industrial dispute is taken to be a temporary stoppage of work by a group of employees to express a grievance or enforce a demand or temporary withnolding of work from a group of employees by one employer (or a group of employees) in connection with matters relating to employeen or non-employment or terms or condione employer (or a group of employers) in connection with matters relating to employment or non-employment or terms or conditions of employment. Thus, both the types of work stoppages, popularly known as 'strikes' and 'lock-outs' are covered. Political strikes, sympathetic demonstrations and the like are, however, excluded. The statistics cover such disputes in which the number of workers involved is ten or more in all the sectors of economic activity such as factories, plantations, mines, transport, construction, services etc. It must also be mentioned that the monthly figures of number of strikes and number of workers involved are not additive to form annual figures because of the fact that the period or duration of the strike may have spread over more than one additive to form annual figures because of the fact that the period of duration of the strike may have spread over more than one month. The table No. 12.7 and 12.8 give some important statistics concerning cases decided under Workmen's Compensation Act, and compensation paid to the workers involved in accidents. The table No.12.9 (A) gives results of Annual Survey of Industries (Census Part) conducted by Government of India. Figures for 1965 and 1966 are shown. The data are reproduced from "Annual Survey of Industries, 1965 and 1966 Census sector (Provisional Results) General Review", published by the Central Statistical Organisation, Calcutta. The figures for 1966 are provisional while those for 1965 are revised. The table gives results of the Census Part alone under which, factories employing 50 or more workers with the aid of power or those employing 100 or more workers without the aid of power are completely enumerated. Number of registered factories shown under column (3) are those registered under the Factories Act, 1948 which employ 50 or more workers with the aid of power and 100 or more workers without the sid of power including those which did not work during the year. Productive capital relates to 31st December in the case of facttered under the Factories Act, 1948 which employ 50 or more workers with the aid of power and 100 or more workers without the aid of power including those which did not work during the year. Productive capital relates to 31st December in the case of factories which closed their accounts on that date and in other cases to the date on which accounts were last closed prior to 31st December. It consists of fixed and working capital. Number of persons employed is the average number of persons employed under various heads such as workers, other than workers etc., and it includes persons on leave with pay such as sick leave, casual leave or paid vacation. Gross output represents value of products and by-products manufactured for sale, work done for customers and a sale value of goods sold in the same condition as purchase and is adjusted for the difference in stocks of semi-finished goods at the beginning and at the end of the Survey year. Value added by manufacture is computed by deducting from the gross ex-factory value of output, the gross value of input. Value added is net of depreciation. Table No. 12.9 (B) which is newly added in this issue represents the results of Annual Survey of Industries (Sample Part) for the year 1966, published by Indian Statistical Institute, Calcutta. The Sample part generally comprised all factories employing less than 50 workers with the aid of power and less than 100 workers without the aid of power and factors under section 85 of Factory Act. It also included factories reported as closed. However, it exclude defence factories, restaurants and cafes, those engaged in storage and distribution of oil technical training institutions not producting anything for sale or exchange as well as electricity. institutions not producting anything for sale or exchange as well as electricity.

# 16. Electricity (XIII):

16.1. The table No. 13.1 gives figures of (i) installed capacity, (ii) output and (iii) consumption of electricity during 1951 and 1956 and during the financial years from 1960-61 onwards. The figures relate to only public utilities including Chola Power House, Bombay. The table No. 13.2 gives progress of electrification under Maharashtra State Electricity Board up to 31st March 1968. The table does not include villages and towns which are electrified by the private agencies.

#### 17. Transport and Communications (XIV):

17.1. In this section, statistical information relating to various modes of transport is given. The table No. 14.1 gives districtwise railway length. The statistics relating to railway length in the country are initially compiled by the Railway authorities. But these statistics are according to railway zones and the districtwise break-up is not available. The districtwise figures had to be specially compiled by referring to railway time tables and the railway map. Difficulty arose while measuring the distance between railway station one of which was in one district and the other in the other district. Also, it was rather difficult to measure correctly the distance between the station located in the State and the boider of the State. The figures presented in this table are approximate. The table Nos. 14.2 and 14.3 give figures of road length for 1967-68. The figures relate to extra municipal roads maintained by the State's Buildings and Communications Department and Local Bodies such as Zilla Parishads. Roads maintained by municipal authorities are excluded. The table No. 14.4 gives figures relating to different types of motor vehicles in operation as at the beginning of calendar year of 1968. The regions shown are (i) Bombay region consisting of Greater Bombay district, (ii) Thana region consisting of rest of Bomby division, (iii) Poona region covering Poona division, (iv) Aurangabad region covering Aurangabad division and (v) Nagpur region covering Nagpur division. The table No. 14.5 gives important operational statistics relating to Maharashtra State Road Transport Corporation. The figures relate to financial years. Table Nos. 14.6 to 14.9 give some important statistics regarding traffic bandled by Bombay Port, figures of overseas traffic and coastal traffic are shown separately in table No. 14.10 gives cargo (imports and exports) handled at various minor ports of the State. The table No. 14.18. The table No. 14.10 gives cargo (imports and exports) handled at various minor ports of the State. The table No. 14 In this section, statistical information relating to various modes of transport is given. The table No. 14.1 gives district-

# 18. Employment (XV):

18.1. The first seven tables included in this section give economic classification of the population in the State made at the time of 1961 Population Census. For this purpose necessary particulars were recorded in respect of each individual person and the entire population was first classified into (i) workers and (ii) non-workers. A person is classified as worker if (a) in the case of seasonal work he had some regular work of more than one hour per day throughout the greater part of working season and (b) in the case of regular employment in any trade, profession, service, etc., he was employed during any of the fifteen days preceding the day of the enumerator's visit to his household. Those who did not conform to the above concept (women doing household work, students, rent receivers, beggars and unemployed persons, etc.,) were classified as non-workers. Here 'work' mean "Gainful work". The workers were further classified and only only the category. ful work". The workers were further classified into nine main categories of economic activity. The number in each category and the total number of non-workers are shown in table No. [5.]. Category I includes both owner cultivators and tenant cultivators. Category II covers all other persons working on land as labours on wages without holding any right upon the land. Workers in household industry are included under Category IV, Household industry is defined as an industry conducted at home in urban areas or within the village in rural areas by the head of the household himself and/or mainly by the members of the household. A household industry is not run on the scale of a registered factory and relates to repairing or making of goods. main criteria for household industry are its smaller scale, its being run at home in urban areas and within the village in rural areas. Manufacturing (Category V) includes all types of production, processing, servicing or repairing of goods. This category does not include production, processing, etc., which may be classified as household industry. Category VI covers workers engaged in construction and maintenance of buildings, roads, railways, bridges, telegraph and telephone lines waterways, reservoirs, etc. Under category VII workers engaged in any capacity in wholesale or retail trading activity and commercial transactions relating to imports and exports, real estate and properties, stocks and shares, insurance, moneylending ,banking, etc., are included. Category VIII includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, and exports, real estate and properties, stocks and shares, insurance, moneylending banking, etc., are included. Category VIII includes workers engaged in transport activities by air, rail, road and water and in services incidental to transport such as packing, carting, loading, unloading etc. Workers engaged in storage, ware-housing and communication services such as Posts, Telegraphs, Telephones, Wireless signalling, Information and Broad-casting are also included in this category. Workers engaged in (1) Public Utility Services like electricity, gas or water-supply and sanitary services, (ii) Central, State, Quasi-Government or Municipal Employees in administrative departments or offices, (iii) Professional services, and (iv) Trade or labour associations, recreation services, etc., are covered under category IX. The table Nos. 15.2 and 15.3 give occupational classification of workers engaged in work other than cultivation. "Occupation" of a worker is the function which he personally performs by engaging himself in work in any branch of economic activity which is called his industry. The concept of "Occupation" is thus distinct from that of "Industry". The latter is defined as the sector of economic activity in which a worker is engaged. Classification of the former is the work performed personally by the individual concerned. Occupations are classified according to National occupational Classification (NCC) Scheme. The table No. 15.2 gives classification into 10 Occupational Divisions in each district. The table No. 15.3 gives detailed classification for the State. In this classification each Division (denoted by prefix D) is sub-divided into Groups (G). Each group is sub-divided into Families (F). The table gives classification according to families in respect of a few important groups only. The table No. 15.4 gives distribution of workers by industry (other than cultivation) classified according to the Standard Industrial Classification Scheme up to the two-digit level. The table No. 15.5 shows the total nu

# 19. Education (XVI):

19.1. Salient features of progress of education in various parts of the State are presented in this section. Table No. 16.1 gives the towns and villages with and without schooling facilities. Towns and villages with a school are those which have at least a primary school within them. Villages with schooling facilities include smaller villages (generally below 300 population) which cannot be given independent school for economic reasons and are therefore, attached for schooling facility to bigger villages or to urban areas within a "walking distance" of one mile from them. The table Nos. 16.2 and 16.2 (A) give information regarding number of institutions and enrolment therein, by type of education. In table No. 16.2 (A) those categories of education are shown for

which the institutions are reported in a very few districts and such categories are not shown in table No. 16.2. Table No. 16.3 gives enrolment of students and number of teachers. It also gives number of trained teachers and break-up in male and female. The classification of institutions according to type is slightly different from stages of education. There are at present many Secondary Schools which also impart education in primary courses. Nevertheless, the entire enrolment of students is included under Secondary education. A realistic picture may perhaps be available from table No. 16.4 which gives the break-up of the total enrolment of students in pre-primary, primary and secondary schools according to standards. Children between ages 3 and 5 attend pre-primary institutions. These are generally known as kindergraden, montessory etc. Primary institutions provide education for pre-primary and standards I—IV or standards I—VII/VIII or less and teaches the curriculum approved by the Education Department. Whereas secondary institutions coaches students for standard VIII to X or XI/XII with or without lower standards. Higher education is education after passing Seoncdary School Certificate Examination which leads to a degree examination. The table No. 16.5 gives distribution of pupils according to medium of instructions. Information pertaining to six important languages is shown separately. The table No. 16.6 gives particulars of examination results held during 1967-68. The statistics is presented according to examinations. which the institutions are reported in a very few districts and such categories are not shown in table. No. 16.2. Table. No. 16.3

# 20. Judicial and Administrative (XVII):

In this section, the relevant statistical data relating to the Police Department of the State, Judicial Courts and Prisons are included. As regards statistics regarding Police, the same are presented in two parts—one relating to activities of Greater Bombay Police and the other relating to rest of the Police organisation including railway police. The table No. 17-12 gives information regarding cost and strength of police in Greater Bombay for 1967. The temporary and permanent strength is shown separately. Similar information about the rest of the Police Organisation (including railway police) is shown in table No. 17-2. The strength shown in these tables of different categories gives the number of posts created in various offices of the Police Department. Statistics regarding cognizable crimes handled by Police Department are presented in table Nos. 17-3, 17-4 (Greater Bombay) and 17-8 and 17-9 (rest of the State). Information regarding the disposal of cases handled by the Police and statistics regarding the number of persons involved in these cases are shown separately. Similar statistics regarding non-cognizable crimes are shown in table Nos. 17-5, 17-6 (Gerater Pombay) and 17-10 and 17-11 (rest of the State). Information regarding number of police stations, out posts, total strength of police and total number of cognizable cases dealt with by the police in each district. Table No. 17-13 gives particulars of different types of cognizable coffences handled by the police in the entire State. Batistics relating to Judicial Court for 1963 is presented in table Nos. 17-13. Number of judicial Greater in civil and criminal cases exercising appellate and original jurisdiction are shown in table No. 17-15 gives and ficers in civil and criminal cases are given number, description and value of civil suits in two parts in civil courts and courts at the headquarters of the State or State of Government. General results of civil and miscellaneous cases in civil courts and courts at the headquarters and of criminal cases in

# 21. Press and Publications (XVIII):

21.1. This section gives information regarding number of printing presses working in the State and some important particulars about books and periodicals published in the State in 1967. Wherever possible, further classification of books and periodicals according to languages and according to subjects is also given here. Table No. 18.1 gives number of printing presses in each district. In the table No. 18.2 the classification of newspapers (as defined by section 1 of the Press and Registration of Books Act, 1867) according to language and periodicity is given. Table No. 18.3 gives statistics of books published for 1967 according to type. Information given in table Nos. 18.4 and 18.5 is about the classification of books and periodicals according to languages and number of books and periodicals published according to subjects. Moreover, the periodicals shown in these tables do not include periodicals, the periodicity of which is of short duration, such as dailies and fortnightlies.

# 22. Medical (XIX):

22.1. In this Sector four new tables on vital statistics, family planning programme, vaccinations and revaccinations are added in this issue. Table No. 19-1 gives some important vital rates viz., sex ratio at birth, sex ratio at death, vital index etc. Vital index is the percentage of births to deaths. Table No. 19-2 gives districtwise figures of birth rates, death rates and infant mortality rates and their break up in urban and rural for the year 1967. Birth rate is the number of births per thousand estimated population of the year. It can be of value in indicating in a general way variations between population having differnt geographical area. The formula is:

Birth rates =  $\frac{D}{N}$  ×

(D-No. of live births which occured among the population of the given geographical area, N-estimated mid year population.)

Death rate is the total number of deaths per thousand estimated population of the year. The formula is :

Death rates = 
$$\frac{X}{N}$$
 × 1000.

(X-No. of deaths which accured among the population of the given geographical area. N-Estimated mid year population.)

Infant mortality rate serves as one of the best indices to the general "Healthiness" of a society. It is also a ratio of total deaths under one year of age to total live births.

No. of deaths under I year of age  $\times 1000.$ The Formula is No. of live births which occured among the population of given geographical area

The data on vital statistics was collected through revenue agency in rural area and for urban area it is statutory function of Municipalities and Municipal Corporations.

Table No. 19-3 gives number of deaths due to different diseases. Number of 19 different diseases are given. Deaths caused by injuries are also given. Table No. 19-4 gives information regarding number of hospitals and dispensaries working and total number of beds in each district. The table covers all State and Central Government institutions, institutions owned by municipalities and local bodies and also private aided institutions. Under private institutions, charitable institutions or institutions maintained by private bodies are covered. The private clinics run by individuals are not included. The Primary Health Centres and control of the State's Directorate of Public Health and under Zilla Parishads are not included in this table.

Table No. 19-5 gives statistics regarding No. of family planning centres as on 31st March 1968 and their progress of work done during the year 1966-67 and 1967-68 in each district of Maharashtra. The centres run by the various agencies are also included. It also includes mobile family planning centres. In these centres the sterlizations, IUCD insertions and distribution of conventional contraceptives are done regularly. The sterlization operations performed on male is called "Vasectomy" and that on female is called "Tubectomy". IUCD device is meant for women and is used for spacing as well as for stopping of the births.

Table No. 19.6 gives districtwise performance of primary vaccinations and revaccinations during 1966 and 1967, successful primary vaccination is one which on examination after one week shows a typical of jennerian vesicle and successful revaccination is one which on examination after one week shows reactions like vesicular or pustular lesion or an area of definite palpable induration or congestion surrounding a central lesion which may be scab or ulcer. These reactions should be termed 'major reactions'. All others should be termed equivocal reactions.

# 23. Housing (XX):

23·1. This section gives data on housing collected through 1961 Census. In the 1961 Census, a "house" was defined as "a structure or part of a structure (inhabited or vacant or a dwelling, a shop, a shop-cum-dwelling or a place of business, workshop, school, etc.) with a separate entrance whether that separate entrance led directly to the street or to a common staircase, courtyard or a gate". The table No. 20·1 gives classification of houses according to the purpose for which they were used. The distribution of 1,000 Census households by the number of rooms occupied is given in table No. 20·2, which is based on 20 per cent sample. A room has four walls with a doorway and a roof overhead and of at Jeast 6'×6' dimensions. Unenclosed verandah, kitchen, store, garage, and cattle-shed or places of sizes smaller than 6'×6' as not treated as rooms. Households residing in any one of such places are treated as having no regular rooms. A 'household' is a group of persons who commonly live together in the same house and take their meals from a common mess unless exigencies of work prevent any of them from doing so. Material presented here is restricted only to the family type of households. Institutional household, are not included here.

# 24. Prices (XXI):

24·1. Table No. 21·1 gives month-end wholesale prices of some important agricultural commodities ruling at important market places in the State. Price at the end of June 1967, September 1967, December 1967 and March 1968 are shown. Price as at the end of each month are regularly published in the 'Maharasntra Quarterly Bulletin of Economics and Statistics'. These data are initially collected by the office of Marketing Research Officer, Bombay. Table No. 21·2 gives prices of gold and silver at the Bombay Market, as published by the Reserve Bank of India in their Bulletin.

#### 25. Index Numbers (XXII):

25.1. The Index number of wholesale prices in India issued by the Economic Adviser to the Government of India are presented in table No. 22.1. The base year for the series is 1952-53. The details of the method of construction of the index is given in the 'Appendix to index number of wholesale prices in India—revised series'. (1956) issued by the office of the Economic Adviser to the Government of India. The table No. 22.2 gives the new series of consumer price index numbers for working class for seven centres vix., Bombay, Poona, Sholapur, Jalgaon, Nanded, Aurangabad and Nagpur. The base years for the new series are 1960 for Bombay, Sholapur and Nagpur and 1961 for Poona, Jalgaon, Nanded and Aurangabad

The details regarding the scope and method of compilation of the new index for Bombay and Sholapur are given in labour Gazette, December 1965 issue, for Jalgaon and Nagpur in January 1966 issue, for Poona in August 1965 issue and for Nanded and Aurangabad in March 1966 issue of the Labour Gazette issued by the Commissioner of Labour, Government of Maharashtra.

25.2. Table No. 22.3 gives consumer price index numbers for agricultural labourers in Maharashtra. The series is compiled by the Labour Bureau, Simla. The year 1960-61 is the base. The details of the method of construction and scope of the index is given in Indian Labour Journal, Vol. V, No. 11. Table No. 22.4 gives consumer price index number for non-manual employees compiled by the Central Statistical Organisation. The year 1960 is adopted as base. In Maharashtra the index is worked out for Greater Bombay, Poona, and Nagpur. The method and scope of the index is explained in 'Monthly Abstract of Statistics, August 1966' published by the Central Statistical Organisation.

# 26. State Income (XXIII):

26'1. The table No. 23'1 gives revised series of State income estimates at current prices. These estimates are prepared on the basis of comprehensive statistical material which has become available from official records and also collected through sample surveys and type studies conducted by the State Bureau and Central Statistical Organisation over the past few years. The revised series of State Income estimates differ from the conventional series mainly in the usage of the primary statistical data in building up sectoral estimates. The deviations effected in the revised series are indicated separately in the notes on estimational procedure of each sector, given in the 'Report on the revised series of State Income of Maharashtra, 1960-61 to 1967-68'. The Report is published in the Quarterly Bulletin of Econoimes and Statistics, Vol. IX, October 1968, March 1969, of the State Bureau, Bombay.

# 27. State Finance (XXIV):

27.1. Three tables are included in this section. The first two tables give figures of revenue receipts and revenue expenditure of the State under different heads for 1967-68. Further details will be found in the Financial Accounts of the State Government. The third table gives figures of receipts and expenditure on both revenue and capital accounts in a summery form.

# 28. Annual Plan (XXV):

28·1. The table included in this section gives details of expenditure under each major head of development for State Plan and Centrally sponsored programme for 1966-67 and 1967-68.

# 29. Trade (XXVI):

29.1. The first two tables included in this section give particulars of imports and exports of Bombay Port in 1967-68. The information is extracted from the annual report of Bombay Port Trust. The third table gives imports in and exports from this State to the other States of the country by rail. The source of this information is the 'Accounts relating to inland (rail and river borne) trade of India' published by Department of Commercial Intelligence and Statistics, Calcutta.

#### 30. Miscellaneou · (XXVII):

30·1. Five tables are included in this section. The table No. 27·1 gives important financial statistics relating to Reserve B of India. The table No. 27·2 gives classification of 1 massessees assessed to income tax according to range of income assessed to their income and tax payable for the assessment year. 4 65. The assessees are sub-divided into (i) individuals (salary car (ii) individuals (non-salary earners), (iii) Hindu undivide of aplies, (iv) unregistered firms, (v) registered firms, (vi) command (public limited), (vii) companies (private limited) and (viii) others. The total income shown in the table represents the result income assessed to tax after deduction from gross income of (i) income from capital gains and (ii) loss set off against incomeder sections 71 and 72 of the Income Tax Act. The table No. 27·3 gives number of dealers registered under Sales Tax A and their total sales during 1964-65. For this purpose, the dealers are classified into different groups according to the commodit mainly transacted or traded by them. Under the column of sales however, their entire sales are included.

Table No. 27.4 gives number and description of registered documents and value of property transferred relating to gif sales, exchanges, mortgages of immoveable property. The break up of compulsory and optional and their aggregate value is give Registrations affecting moveable property are shown in Columns Nos 10 and 11.

Table No. 27.5 gives number of marriages registered in Maharastra State for 1966 and 1967 under Bombay Marriages Special Marriages Act and other Acts. The Bombay Registration of Marriages Act, 1954 is applicable to all the corporaticities, municipal towns and headquarters of tahsils.
